

ULTRASONIC B

DEGREASER

ULTRASONIC B is a concentrate liquid, developed primarily as an adding agent of alkaline degreasing solutions applied by dipping and spraying. ULTRASONIC B it is a product composed of non-ionic surfactants in aqueous base, it has an extraordinary degreasing power getting a significant reduction in surface tension and with an optimal wetting effect.

DOSAGE AND METHOD OF USE:

ULTRASONIC B according to severity of contaminants to remove, it should be used in concentrations between 0.1 y 0.5%, referring to the volume of the bath.
Store between 5 and 30 °C away from moisture and direct sunlight.

TECHNICAL SPECIFICATIONS:

Appearance: Liquid
Color: Yellow
Smell: Characteristic
Boiling point: 96 °C
Inflammation temp: No inflammates
Steam pressure: aprox. 23.3 hPa
Density 20°C: aprox. 1.015 g/cm³
pH: 6 - 7.2
Refraction: 1.43 -1.44
Refraction value: 54 - 59 Brix
COV g/l: 0 g/l

This product meets the existing legislation on biodegradability and the Sanitary Technical Regulation on Detergents.
