

ULTRASONIC ELECTRO

DIELECTRIC DEGREASER

ULTRASONIC ELECTRO is formulated to be used as a detergent and degreasing for engines and electrical parts by immersion in ultrasonic cleaning machines. It is particularly suitable for removing plaque embedded grease, oil and any kind of dirt.

For its formulation, based on surfactants, alkalis, and complexing agents, is indicated for use as an industrial degreaser circuit, recirculation systems cleaning, scrubbing and cleaning machines dip ultrasound machines.

DOSAGE AND METHOD OF USE

In cleaning systems ultrasonic bath was used diluted in water at a ratio of 2% and 5% depending on the degree of soiling.

TECHNICAL SPECIFICATIONS

COLOUR	ORANGE-RED
APPEARANCE	CLEAR LIQUID
ODOR	CHARACTERISTIC
DENSITY	1,00 +/- 0,05 g/cm ³
pH 1%	8,5 +/- 0,5

CONTAINS

5 – 15 %	Nonionic surfactants
15 – 30 %	Glycols

This product meets the existing legislation on biodegradability and Health Technical Regulation on Detergents.
