

ADISEC

DRYING ADDITIVE FOR ULTRASONIC CLEANING MACHINES

ADISEC is specially indicated to lower the surface tension of water in parts cleaning processes. It is a highly emulsifying grease and dirt power product, ideal for improving the process of rinsing with water.

At the industry level shall apply to the finish during the rinsing step in the cleaning process of parts by immersion, ultrasonic cleaning, etc.

DOSAGE AND METHOD OF USE

ADISEC may be used diluted in the water tank immersion ultrasonic machine at a ratio between 0.5 to 3%.

TECHNICAL CHARACTERISTICS

COLOR	COLORLESS
ASPECT	TRANSPARENT LIQUID
ODOR	CHARACTERISTIC
DENSITY	0,98 +/- 0,02 g/cm ³
pH	7,5 +/- 0,5

CONTAINS

5 % – 15 %	Alcohols
< 5 %	Non ionic surfactants
Preservation agents: Benzisothiazolinone, Methyl isothiazolinone	

This product meets the existing legislation on biodegradability and the Sanitary Technical Regulation on Detergents.
