

ULTRASONIC 250

METAL RUST REMOVAL

ULTRASONIC-250 is a deoxidizing, degreasing and detergent that removes all types of rust and stubborn dirt on metal surfaces. Very effective in cleaning and descaling of ferrous metals, steel, brass, sheet metal, etc. in ultrasonic washing machines.

Is an effective descaling agent that can be used for the elimination of all forms of lime scale and rust.

DOSAGE

ULTRASONIC-250 may be used diluted in the water tank of ultrasonic cleaning machine between the 1% - 15% depending on the dirty and oxide overlay to eliminate.

TECHNICAL CHARACTERISTICS

| | |
|---------|---------------------------------|
| COLOR | COLORLESS |
| ASPECT | TRANSPARENT LIQUID |
| ODOR | CHARACTERISTIC |
| DENSITY | 1,47 +/- 0,05 g/cm ³ |
| pH 1% | 1,5 +/- 0,5 |

CONTAINS

| | |
|--------|-----------------|
| > 30 % | Inorganic acids |
|--------|-----------------|

This product meets the existing legislation on biodegradability and the Sanitary Technical Regulation on Detergents.
